EXPERIENCE

Secured Records Management Solutions, — *Undergraduate software developer intern*

May 2023 - Oct 2023

Outline:

Worked with SRMS where I reported to supervisors and team members in order to efficiently complete assigned tasks.

Key responsibilities:

- Performed Error Testing of a company application that was in development.
- Documented errors and notified the developers assigned to fix them.
- Developed an application that can interface with other company applications to collect, display, and forward exceptions to on-call developers.
- Attended the Daily Standup meetings
- Liaised with coworkers on current activities and updates

Scrella Technologies — Backend developer intern

September 2024 – Present

Outline:

Worked on an application by writing API endpoints, testing new features, and fixing bugs while providing updates in daily stand-up meetings.

Key responsibilities:

- Contributed to the development of new application features by implementing API endpoints.
- Conducted testing to validate newly added features and ensure functionality.
- Provided progress updates in daily stand-up meetings.
- Identified and resolved software bugs to enhance application performance.
